

Create Your First Mini Project

Module 4 — The AI Creation Lab

Purpose of This Activity 🎨

This mini project is your chance to **create something small** using AI — something practical, creative, or useful to you.

You're not aiming for perfection.

You're aiming to **finish something simple**.

That's how confidence is built.

How This Mini Project Works 🌀

- Choose **one** project option below
- Keep it **small and manageable**
- Use AI to support you — not replace you
- Stop when it feels “good enough”

You can always come back later and try another option.

Mini Project Option 1: Write a Blog Post or Short Story 📝

What this helps with:

Writing, clarity, creativity

Goal:

Create a short piece of writing you could share or reuse later.

Examples:

- A blog post
- A short story
- A personal reflection
- An educational explanation

Try this with AI:

- “Help me draft a short blog post about ____.”
- “Rewrite this to sound clearer and more natural.”
- “Help me improve the opening paragraph.”

Your notes or draft:

Mini Project Option 2: Create a Social Media Series **What this helps with:**

Messaging, consistency, creativity

Goal:

Create 3–5 short posts around one idea.

Examples:

- Tips on a topic you care about
- A short educational series
- A personal learning journey

Try this with AI:

- “Help me create a short social media series about ____.”
- “Make each post friendly and easy to understand.”

- “Keep each post short and focused.”

Your notes or draft:

Mini Project Option 3: Create a Short Video 🎬

What this helps with:

Visual thinking, communication, confidence

Goal:

Create a short video idea or script.

Examples:

- A talking-point script
- An image-to-video concept
- A short educational clip

Try this with AI:

- “Help me write a short script for a simple video about ____.”
- “Turn this idea into a 30-second outline.”
- “Simplify this so it sounds natural out loud.”

Your notes or script:

Mini Project Option 4: Create a Simple Digital Product 📄

What this helps with:

Organization, clarity, usefulness

Goal:

Create something reusable.

Examples:

- A checklist
- A guide
- A worksheet
- A simple template

Try this with AI:

- “Help me create a simple checklist for ____.”
- “Keep this beginner-friendly and practical.”
- “Make this easy to reuse.”

Your notes or draft:

Mini Project Option 5: Build a Simple Brand Kit

What this helps with:

Clarity, consistency, confidence

Goal:

Define a basic personal or project brand.

Examples:

- A short bio
- Tone and voice description
- Key messages or values

Try this with AI:

- “Help me write a short bio that sounds friendly and professional.”
- “Help me define a clear tone for my content.”
- “Simplify this so it feels authentic.”

Your notes or draft:

Reflection (Optional)

You don't need to answer all of these.

- Which option did you choose — and why?
- What felt easier than expected?
- What would you do differently next time?

Remember ✓

Finishing something small
is more powerful than starting something perfect.

This project isn't about output —
it's about **momentum**.

You just created something using AI —
and that matters.
