

"AI Made Simple: Your First Steps into Artificial Intelligence"

Module 1: Welcome & Orientation

- What you'll learn in this course
- How to get the most out of it (no tech background needed)
- Simple introduction: What is AI, really?

Module 2: Everyday AI – Spotting It Around You

- AI in your daily life (voice assistants, chatbots, recommendations, etc.)
- Myths vs. reality (AI is not magic, it's math + data)
- Why AI is everywhere right now

Module 3: The Basics of How AI Works

- Data, patterns, and predictions (plain language examples)
 - Machine learning in one sentence
 - Difference between AI, Machine Learning, and Generative AI
 - What AI Can and Can't Do
-

Module 4: Getting Hands-On with AI Tools

- A simple demo (e.g., ChatGPT or a free AI art generator)
 - How to ask good questions (prompts)
 - Practice activity: Create more AI-generated text and images
-

Module 5: Using AI Safely & Smartly

- Tips for ethical use
 - Common mistakes beginners make
 - Staying safe online with AI tools
-

Module 6: Quick Wins You Can Try Today

- How AI can help with writing emails, notes, or brainstorming
 - How to use AI for fun (stories, art, music)
 - How to use AI for learning faster
-

Module 7: Next Steps on Your AI Journey

- Where to go from here (free resources + your other courses)
 - What's next for AI (narrow AI, AGI, ASI)
 - Encouragement: You don't need to be "techy" to use AI
 - Wrap-up & final activity: Create a personal AI action plan
 - Bonus material
-
